Web Administrator Interview Questions

1. Can you please tell us more about your experience with website administration?
2. What do you think about our corporate website. What improvements would you suggest?
3. What programming languages do you have experience with?
4. What tracking tools and software do you have experience with?
5. What are some of the common reasons for a slow loading website? How can you address them?
6. Tell us about a time when you struggled to explain a rather technical issue to someone without technical knowledge. What did you do to eventually get your message over?
7. Tell us about the biggest issue you've ever faced while administrating a website.
8. Imagine that you open a homepage of our corporate website and see a smiley picture of a hacker on your screen. What steps will you take?
9. How do you imagine a typical month in this job? What tasks do you think you should do on a daily, weekly, and monthly basis?
10. In your opinion, what are the five most important plugins each WordPress website should have installed?
11. Describe a website you recently visited that was poorly designed. Show us the website and tell us what you'd improve on it.
12. In your opinion, what are the most important metrics we should track with our website?
13. If we hire you for this job, what goals will you set for yourself for the first 90 days in work?
